Enjoy!!! **Beta update #6: the big interface fixes list:**

A pretty quick update, seeing as #5 was yesterday, but there were a few important things that needed fixing!

Apparently there was a huge bug for people playing with just the mouse and accessing datacards or talking to NPC's. I didn't know about this since I rarely play with the mouse ;) if you run into things like this don't shy away to throw it on the forum or just poke me on twitter (@orangeascal)

I also (finally!) got the map rendering nicely centered.. which was irritating me personally, along with various other interface improvements as you can read in the list below.

But there is also something new in the update, the first power-weapon: The berzerker. This is a special weapon you can pick up and sits in your inventory, it has both a positive and a negative effect (someone on the forum mentioned and made me come up with some ideas). Basically this weapon is extremely powerful, but it will also use extremely many shells!

More power-weapons are coming!

for now, enjoy the update, and let me know if you run into weird stuff in the forums.

#### **interface:**

- fix: map now centered
- fix: “nocontroller” setting works again (oops)
- fix: mouse-controls and dialogs reappearing bug
- fix: i-key now also closes inventory
- fix: improved datacard navigation/selecting
- fix: added “found X cards” to datacard menu
- fix: mom-spider now fits better in datacards

#### **game:**

- change: NPC's now show up less frequent

- 
- add: first power weapon “berzerker” , high kill rate but costs a lot of shells
  - fix: less screen-shake with smaller bombs
  - fix: more checks for only handing out 1 alien-artifact
